Yash Nilesh Gori

Mumbai, MH | yashnileshgori@gmail.com | (+91)7718081766 | Portfolio | linkedin.com/in/yashgori20 | github.com/yashgori20 | Huggingface

Summary

Al Engineer experienced in building and deploying ML and GenAl systems, including Retrieval-Augmented Generation (RAG), predictive modeling, and scalable APIs. Experienced in building scalable AI platforms (GPT, Mixtral, Gemini), optimizing compliance systems, and deploying systems with sub-second latency.

Experience

Al Engineer | Webotix IT Consultancy

Dec 2024 - June 2025

- Built Al-powered QC automation platform (Azure OpenAl + RAG), cutting template creation time by 90% with 80% compliance accuracy.
- Designed multi-tenant architecture (Azure Cosmos DB + Redis caching), enabling sub-second responses.
- Integrated Azure Document Intelligence OCR to digitize legacy QC docs; secured \$5k Microsoft Al Hub funding for B2B deployment.

Business Analyst | N. K. Engineering

June 2024 - Nov 2024

- Built automated Power BI dashboards tracking 15+ KPIs, uncovering ₹5Cr+ revenue opportunities in underserved engineering niches.
- Used predictive analytics to flag growth pockets; recommendations contributed to 12% market share expansion.
- Designed a responsive e-commerce platform and interactive product catalog, improving customer engagement.
- Applied ML-driven competitive analysis to identify five high-value investor prospects all closed.

Product Design Lead | MetaRizz

Dec 2023 - May 2024

- Refactored legacy design of GuestInMe; shipped table booking and club pass features used by 1,000+ users.
- Partnered with Flutter devs to turn specs into API-ready tickets; kept scope tight and delivery on time.
- Used engagement analytics to iterate on flows; campaigns and in-app UX changes drove a 40% lift in key interactions.
- Acted as the product-engineering bridge: backlog, acceptance criteria, QA sign-off.

Business Development Manager | Watermelon Gang

Aug 2022 - Nov 2023

- Led Al-assisted content production pipeline for 5 enterprise fintech & crypto clients, managing editor & copywriter.
- Deployed analytics-driven strategies using social media performance data, improving engagement by 35%.
- Applied AI tools for content optimization, increasing CTR and retention on client campaigns.

Projects

Swift Check Al: QC Platform | Azure OpenAl, Flask, Document Intelligence, Cosmos DB, Redis, Docker

- Architected multi-tenant RAG microservice (Azure OpenAI + FAISS-style retrieval) for template generation and compliance validation; integrated Azure Document Intelligence OCR.
- Cut document generation time 90%; supported 25+ configurable parameters and maintained ~80% compliance accuracy with sub-second cached responses.

Financial Compliance Automation Tool | Python, Mixtral LLM, GROQ Cloud, FAISS, Model Training

<u>Link</u>

- Built custom RAG pipeline trained on RBI docs; iterative refinement achieved ~80% compliance prediction accuracy.
- Demonstrated 10% potential annual cost-savings opportunity for banks via automated checks.

Inhance: LinkedIn and Resume Profile Optimization Platform |Streamlit, GROQ Cloud, Mixtral LLM, Multi-Agent System

<u>Link</u>

- Implemented multi-agent evaluation and ATS-scoring pipeline; produced role-specific optimization suggestions and LaTeX resume generation.
- Delivered automated, actionable recommendations and an interactive enhancement agent for profile tuning.

DocuTalk: Al-Powered Document Intelligence Platform | Python, FAISS, LangChain, Gemini Embeddings, Flask

Link

- Engineered semantic search + conversational layer using Gemini embeddings + FAISS; handled context-aware Q&A for docs 100+ pages.
- Cross-platform deploy (Flutter) and reduced manual review from hours to minutes; adoption improved 40%.

Skills

AI/ML Core: Retrieval-Augmented Generation (RAG) systems, vector databases (FAISS, Pinecone), LLM integration (GPT, Mixtral, LLaMA, Gemini), OCR processing, NLP, prompt engineering

Programming & Frameworks: Python, LangChain, Streamlit, FastAPI/Flask, Azure (OpenAI, Cosmos DB, Container Apps), Docker, GitHub Actions.

Data & Analytics: Pandas, NumPy, model evaluation (AUC, F1), Power BI.

Education

K. J. Somaiya College of Engineering

B.Tech. in Information Technology | CGPA: 8.12/10

Mumbai, Maharashtra 2021–2025

Impact and Achievements

Semi-finalist | Devopia 7.0 Hackathon - Top 3 teams for Al-powered solution.

Volunteer Instructor | Vacha NGO - Designed educational programs and taught for 30+ underprivileged students.

Microsoft Al Hub - Secured funding through competitive pitch for Swift Check Al platform
