

Yash Nilesh Gori

AI Product Manager

Mumbai, India | yashnileshgori@gmail.com | +91-7718081766 | linkedin.com/in/yashgori20 | Portfolio | github.com/yashgori20

Summary

Product Manager for enterprise B2B software, specializing in AI products. At **FactWise** I own core areas of a procurement platform; the **OpenAPIs** I shipped are a **licensed offering (INR 7–10L per client)** powering **40K+ live purchase orders and contracts**. Earlier, I built a GenAI product's prototype solo in **4 weeks**, secured **\$5,000 from Microsoft for Startups**, and took it to production with a team. I pair product judgment (discovery, prioritization, tradeoffs) with the technical fluency to build and ship with AI.

Experience

AI Product Manager

Dec 2025 – Present

FactWise (B2B procurement & sourcing SaaS platform)

Mumbai, India

- Own the **Purchase Order (PO)** module end-to-end for **4+ enterprise manufacturing clients**, covering how orders are created, approved through role-based flows, and revised. Shipped an **in-place revision workflow** so teams can modify an issued PO, with re-validation and a clean audit trail, instead of cancelling and recreating it.
- Defined and shipped FactWise's **OpenAPIs** (bulk create/update/get across **items, vendors, POs, and contracts**, plus **SAP ID-mapping**), used daily by clients; sold as a **licensed offering (INR 7–10L)** to **3 enterprise clients**, powering **40K+ live POs and contracts**.
- Own the **Bill of Materials (BOM)** module, which manages the multi-level parts lists manufacturers buy against. Shipped **parallel BOM revisions** so a single BOM can run multiple versions across live orders at the same time.
- Built an **AI agent (served via MCP)** on top of the OpenAPIs after clients found their strict request formats hard to use. Users describe what they need in plain language; the agent picks the right **OpenAPI**, asks for missing details, and executes the request, turning bulk procurement actions into a simple conversation.

AI Product Manager

Dec 2024 – Dec 2025

Webotix IT Consultancy (Early-stage startup building GenAI quality-control software for food manufacturing)

Remote / Dubai

- Took **SwiftCheck AI 0→1** as PM. Compliance teams were hand-building stage-wise QC templates and reviewing **1000s of QC documents weekly**; SwiftCheck **digitizes the entire food-QC workflow** with **AI-generated inspection templates**, standardized data capture, and multi-level approvals. Built the prototype with AI in **4 weeks**, then led a **cross-functional team of 3** to take it to production.
- Aligned internal stakeholders (**CEO, COO**) on scope and roadmap, and refined the product through demos and feedback from **multiple enterprise clients**, tailoring the QC workflow to how their teams actually operate.
- Built the GenAI engine (**RAG** over FAISS/Pinecone vector databases, AI agents) that auto-generates the QC templates, reaching **80% accuracy** against client specs and cutting QC-document creation time **90%** vs. building templates manually.
- Secured **\$5,000 from Microsoft for Startups** by pitching product vision, business potential, and demoing the working prototype.

Business & Growth Management Intern

Aug 2022 – Nov 2023

Watermelon Gang (Social media & marketing agency)

Mumbai, India

- Drove growth strategy for **5+ enterprise fintech & crypto clients**, including **CoinDCX, Binance, and Kotak 811**, running **A/B tests** that lifted campaign performance **30 to 60%**.
- Acquired clients via targeted outreach and personalized pitches, then grew accounts through **upsells** and long-term partnerships.
- Scaled a **YouTube channel** from **50K to 80K** subscribers via KPI-led iteration, running a **Kanban content pipeline** (ideation to publishing) with a cross-functional creative team.

Projects

Product Case Studies

[Link](#)

Teardowns of GPay, JioCinema, Vercel, Blinkit & Fireflies AI covering acquisition, engagement/retention, and onboarding strategy.

Interactive AI Portfolio + Chatbot (React, Flask, Groq, GPT-OSS-120B, RAG, MCP)

[Link](#)

Interactive portfolio with an AI assistant that answers recruiter questions using RAG over my experience and projects; engineered grounding, model selection, and guardrails to cut hallucination and token cost.

DocuTalk, AI Document Intelligence (Gemini, FAISS, LangChain, Flutter)

[Link](#)

Cross-platform RAG assistant for conversational Q&A across any document.

Skills

Product Management: Product Strategy, Product Discovery & Customer Research, Roadmapping & Prioritization (RICE/MoSCoW), PRDs & Requirements, Go-to-Market, Success Metrics & Experimentation (A/B Testing), Stakeholder Alignment

AI Product: LLM Product Design, Agentic AI & MCP (Model Context Protocol), RAG with vector databases (FAISS/Pinecone), Prompt Engineering, Model Evaluation & Tradeoffs, AI Cost/Latency Optimization

AI-Assisted Build: Ship production full-stack features end-to-end with AI (Claude Code, Cursor, Codex, Gemini) across a FastAPI / React / Python / Azure / Docker stack

Tools & Data: Jira, Figma, Notion, Power BI, Python, SQL, FastAPI, React, Azure, Docker, REST APIs

Education

K. J. Somaiya College of Engineering

2021 – 2025

B.Tech. in Information Technology, **CGPA 8.12/10**

Mumbai, India

Impact & Certifications

- Volunteer Instructor, Vacha NGO:** designed and delivered educational programs for **30+ underprivileged students**.
- IBM AI Product Manager Professional Certificate.**
