Yash Nilesh Gori

AI Product Manager

yashnileshgori@gmail.com | +91-7718081766 | linkedin.com/in/yashgori20 | Portfolio | github.com/yashgori20

Summary

AI Product Manager combining enterprise product ownership with hands-on AI building. At FactWise, designed a **procurement AI agent and BOM Data Mapper**, and shipped **licensed APIs** supporting **40K+ live purchase orders and contracts**. At Webotix, built SwiftCheck AI's initial prototype and led a **three-person team to production**, reducing **QC-document creation time by 90%**.

Experience

AI Product Manager Dec 2025 – Present
FactWise (B2B procurement & sourcing SaaS platform) *Mumbai, India*

- Designed a **conversational enterprise procurement AI solution** with **140+ tools** to simplify supplier comparisons, cross-currency cost analysis, and bulk procurement actions. Built in request clarification, transparent missing-data handling, and approval safeguards, with answers grounded in company records and behavior validated through **AI evals**.
- Own **purchase orders and manufacturing parts lists (BOMs)** for **4+ enterprise clients**, translating requests to change issued orders and use different parts-list versions into product requirements and delivery priorities. Shipped revision workflows so teams could **update issued orders without cancelling and recreating them** and keep **different BOM versions active across live orders**.
- When enterprise clients needed FactWise connected to their existing **business systems (ERP), including SAP**, defined and shipped **licensed APIs** for bulk management of items, suppliers, purchase orders, and contracts. Sold to **3 enterprise clients at INR 7–10L per client**, supporting **40K+ live purchase orders and contracts**.
- Identified **manual restructuring of inconsistent BOM files** as a client onboarding bottleneck and designed a reusable **BOM Data Mapper** that converts them into structured parts lists and assembly trees. **Validated with 2 enterprise clients** at **annual pricing of INR 10–12L per deployment**, with a client-estimated **60% efficiency improvement**.

AI Product Manager Dec 2024 – Dec 2025
Webotix IT Consultancy (Startup building AI software for food quality control) *Remote / Dubai*

- Took **SwiftCheck AI from concept to production**, digitizing a paper-based **quality-control (QC) workflow** in which teams manually created inspection templates and reviewed **thousands of documents weekly**. Combined template generation, mobile data capture, and digital approvals. Built the prototype solo with AI in **4 weeks**, then led a **cross-functional team of 3** to production.
- Reduced **QC-document creation time by 90%** by building **SwiftCheck's AI agents** to turn client product specifications into stage-wise inspection templates. Grounded generation in those requirements using **RAG**, achieving **80% template accuracy against client specs**.
- Translated feedback from demos with **multiple enterprise clients** into workflow requirements for compliance teams, shaping SwiftCheck's product scope and roadmap. Led **stakeholder management** with the **CEO and COO** to align priorities and adapt the product to client needs.
- Secured **$5,000 from Microsoft for Startups** by pitching product vision, business potential, and demoing the working prototype.

Business & Growth Management Intern Aug 2022 – Nov 2023
Watermelon Gang (Social media & marketing agency) *Mumbai, India*

- Drove growth strategy for **5+ enterprise fintech & crypto clients**, including **CoinDCX, Binance, and Kotak 811**, running **A/B tests** that improved campaign performance **by 30–60%**.
- Acquired clients via targeted outreach and personalized pitches, then grew accounts through **upsells** and long-term partnerships.
- Scaled Ali Solanki's YouTube channel from **50K to 80K subscribers**, using performance data to refine content and managing a **Kanban content pipeline** from ideation to publishing with a cross-functional creative team.

Projects

Product Case Studies Link
Teardowns of GPay, JioCinema, Vercel, Blinkit & Fireflies AI covering acquisition, engagement/retention, and onboarding strategy.

BOM Data Mapper (Visual Mapping, Fuzzy Matching, PDF/OCR, Reusable Templates) Link
Maps inconsistent Excel, CSV, and PDF parts lists into validated parts data and multi-level assembly trees while preserving hierarchy.

Interactive AI Portfolio + Chatbot (React, Flask, Groq, GPT-OSS-120B, RAG, MCP) Link
Answers recruiter questions using RAG over my experience and projects. Refined model selection, grounding, and guardrails to reduce hallucinations and token costs.

Skills

Product Management: Product Strategy, Customer Discovery & Interviews, PRDs, User Stories & Acceptance Criteria, Backlog Management & Prioritization, Success Metrics, Stakeholder Management

AI Product: Agentic AI & Orchestration, Model Evaluation (Precision/Recall, F1 Score), Prompt Design, MCP, RAG & Vector Databases (FAISS/Pinecone), Grounding, Guardrails & Fallback Design, Model Selection & Tradeoffs

AI-Assisted Build: Prototype and ship full-stack products with Claude Code, Cursor, Codex, and Gemini

Tools & Data: Jira, Figma, Notion, Power BI, Python, SQL, FastAPI, React, Azure, Docker, REST APIs

Education

K. J. Somaiya College of Engineering 2021 – 2025
B.Tech. in Information Technology, **CGPA 8.12/10** *Mumbai, India*

Impact & Certifications

- **Volunteer Instructor,** Vacha NGO: designed and delivered educational programs for **30+ underprivileged students**.
- **IBM AI Product Manager Professional Certificate**.
